---

## Experience

### Web Developer Intern @ PT Kwadran Lima Indonesia

August 3, 2020 - November 3, 2020, Remote

While carrying out the Field Work Practice here, I was accompanied by 2 of my friends. His job is to build a website called PathFinder, a kind of website for job seekers from vocational or college graduates. Starting from slicing and converting to Bootstrap and its Backend using laravel. But the project was not finished.

That's when I started liking Laravel. And the source code can be accessed at <https://github.com/DedeSrwn13/PathFinder>.

## Education

### SMKN 1 CIBADAK.

June 2021, Cibadak

I'am a SMK graduate majoring in Multimedia. At school I learned about packaging design, illustration, 2D animation and video editing.

However I started to like programming about 1.5 years ago and started learning about it. Because there is no Multimedia major, I studied outside of school with some friends.

## Skills

### Programming

Laravel 7

HTML 5

CSS 3

Bootstrap 4

### Design

Photoshop
